BRIEF HISTORICAL SUMMARY: This breed goes back to medium-sized dogs that existed in Japan in ancient times. The Shikoku was bred as a hunting dog, mainly for hunting boar in the mountainous districts of Kochi Prefecture. It is sometimes called "Kochi-ken" (ken = dog). There were three varieties of this breed-Awa, Hongawa and Hata-all named after the area where they were bred. Among them, the Hongawa maintained the highest degree of purity, because the breeding area was not easily accessible from anywhere. These dogs are tough and sufficiently agile to run through a mountainous region. They are characterized by their sesame coloured coats. The breed took on the name of the region (island of Shikoku) and was designated as a "natural monument" in 1937.

GENERAL APPEARANCE: A medium-sized dog with well-balanced and well-developed clean-cut muscles. It has pricked ears and a curled or sickle tail. Conformation: strong, well boned and compact.

IMPORTANT PROPORTIONS: The ratio of height at withers to length of body is 10:11.

BEHAVIOUR/TEMPERAMENT: A dog of marked endurance, keen in sense with a naive feeling, energetic and highly alert; an enthusiastic hunter; docile towards his master.
